## *What is osteoporosis?*

Osteoporosis is a disease that causes very weak bones that break easily. Women are five times more likely to get osteoporosis than men. There is no way to stop or cure it, but there are things you can do to slow it down.

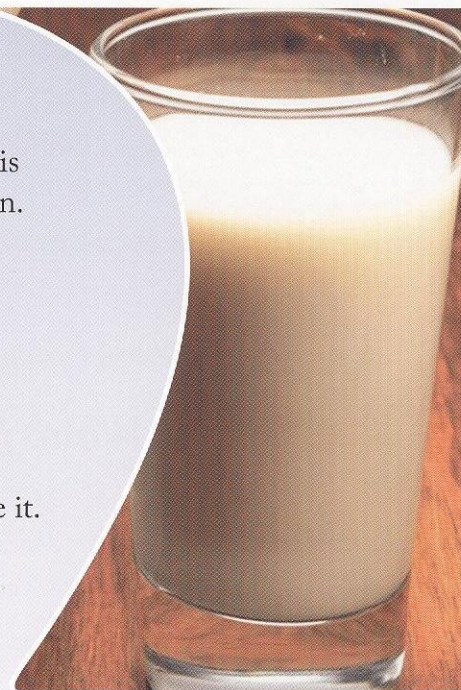

## *What causes osteoporosis?*

- It can run in families
- Not enough calcium and vitamin D in the diet.
- Not getting enough exercise.
- Women who've gone through menopause are more likely to have it.

## *Who is at risk for osteoporosis?*

Anyone can get osteoporosis, but some people have a greater chance such as:

- Women
- People with a thin, small frame.
- If someone in your family had multiple broken bones or a stooped posture
- Women who went through menopause before age 45
- Have or had an eating disorder
- People over age 50
- People who have used certain medicines for a long time, like:
  - Some hormones.
  - Medicines for seizure.
  - Some medicines for asthma, arthritis, or cancer.

### **HOW DO I KNOW IF I HAVE OSTEOPOROSIS?**

There are tests that use either x-rays or sound waves to measure bone density. Ask your doctor which test you might need.

### **CAUSES OF OSTEOPOROSIS:**

- Genetics
- Lack of Calcium and Vitamin D
- Not enough Exercise
- Women who have gone through menopause

### **LOWER YOUR CHANCES OF GETTING OSTEOPOROSIS:**

- Get enough Calcium
- Get enough Vitamin D
- Exercise daily
- Do not smoke
- Do not drink Alcohol

*Continued on Back of Page...*

## *How can I lower my chances of getting osteoporosis?*

- Get enough calcium. Women under 50 years old need at least 1,000 mg of calcium each day. Women over 50 need at least 1,200 mg of calcium.
- Get enough vitamin D. Women under 50 years old need at least 200 IU of vitamin D. Women over 50 need at least 400 IU of vitamin D.
- Get exercise everyday, like walking or biking.
- Don't smoke.
- If you drink alcohol, don't drink more than one glass per day.

### *Which foods have calcium?*

- Low-fat dairy products like milk, cheese, and yogurt
- Green, leafy vegetables like kale and turnip greens
  - Tofu
  - Canned fish (eaten with bones)
  - Orange juice, cereal, and other foods that have calcium added.

### *What else can I do?*

- Talk to your doctor about medicines you can take to build bones. You might also need calcium or vitamin D supplements.
